## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Monroe et al. (U.S. Patent Number 6,181,954) in view of Kita (U.S. Patent Number 6,263,219).

Regarding claims 5 and 8, Monroe et al. discloses essentially all the claimed invention as set forth in the instant application, further Monroe et al. discloses a method and apparatus for image capture, compression and transmission of a visual image over telephonic or radio transmission system. In addition Monroe et al. discloses a image processing unit capable of data communication with mobile telephone (10) and of image output (12) and mobile telephone being capable of communication with a communication apparatus via a network, a data receiving unit for receiving data which has been transmitted from communication apparatus, as disclosed in column 4 line 1-23. However Monroe et al. fails to specifically disclose the use of a incoming-image alert generating unit for issuing an incoming call alert when data that has been received

In the same field of endeavor, Kita discloses a incoming calling system. Kita further discloses an incoming alert generating unit for issuing an incoming signal alert when data that has been received as disclosed in abstract and exhibited in figure 1.

Art Unit: 2681

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to improve Monroe et al. by modifying a method and apparatus for image capture, compression and transmission of a visual image over telephonic or radio transmission system with an incoming alert generating unit for issuing an incoming signal alert when data that has been received as taught by Kita for the purpose of advising the user of incoming information.

*Allowable Subject Matter*

- 6/13/03  
and 6-7
1. Claims 1-4<sup>^</sup> are allowed.
  2. The following is an examiner's statement of reasons for allowance.

Regarding *claim 1 and 4, 6, 7*, The prior art of record considered alone or in combination neither anticipates nor renders obvious a method of a data communication system comprising a mobile telephone capable of communicating with a communication apparatus via a network and an image processing unit capable of data communication with mobile telephone and of image output where mobile telephone includes a first data receiving unit a data transmitting unit and a incoming-voice alert generating unit for issuing an incoming-call alert when data that has been received by first data receiving unit represents voice data, and image processing unit includes a second data receiving unit an incoming-image alert generating unit for generating an incoming-call alert when data the has been received by second data receiving unit represents image data.

Regarding *claim 2*, The prior art of record considered alone or in combination neither anticipates nor renders obvious a method of a mobile telephone capable of communicating with a communication apparatus via a network with and image processing unit that is capable of

Art Unit: 2681

outputting and image, comprising a data receiving unit, a data transmitting unit, and incoming-call alert generating unit for issuing a first incoming-call alert when data that has been received by data receiving unit represents voice data and a second incoming-call alert which is different from the first incoming-call alert.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

3. Applicant's arguments filed 3/31/03 have been fully considered but they are not persuasive.

Applicant arguments regarding Kita failing to teach the incoming alert generating unit for issuing an incoming call alert, the examiner contends that figure 27 incoming notification unit (249) reads on that limitation.

The examiner stands by and restates the above rejection.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2681

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
